Nosilec predmeta/Lecturer:	Petra Kotnik, pred.
----------------------------	---------------------

Jeziki/ Languages:	Predavanja/Lectures: slovenski/Slovenian
	Vaje/Tutorial: slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Vpis v tretji letnik študijskega programa.	Prerequisites: A prerequisite for inclusion is enrolment in the third year of study.
---	---

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> <i>Vloga fizikalne in rehabilitacijske medicine v ginekologiji in porodništvu.</i> Prenatalna, natalna in postnatalna ter pre- in postoperativna ginekološka fizioterapija na vseh nivojih primarnega, sekundarnega in terciarnega zdravstvenega varstva. <i>Anatomija in fiziologija reproduktivnega, urološkega in prebavnega sistema sistema.</i> Funkcija mišic medeničnega dna, trebušne stene, osnove defekacije. Ginekološka in uroginekološka obolenja. Onkologija v ginekologiji. 	<ul style="list-style-type: none"> <i>The role of physical and rehabilitation medicine in gynaecology and obstetrics.</i> Prenatal, natal and postnatal and pre- and post-operative gynaecological physiotherapy at all levels of primary, secondary and tertiary healthcare. <i>Anatomy and physiology of the reproductive, urological and digestive systems.</i> Function of pelvic floor muscles, abdominal wall, basics of defecation. Gynaecological and urogynaecological disorders. Oncology in gynaecology. <i>The role of prenatal (antenatal), natal, perinatal and postnatal physiotherapy in rehabilitation.</i>

<ul style="list-style-type: none"> • Vloga prenatalne (antenatalne), natalne, perinatalne in postnatalne fizioterapije v rehabilitaciji. • Posebnosti rehabilitacije pri nekaterih spremljajočih bolezenskih stanjih v prenatalnem in postnatalnem obdobju. • Ginekološka stanja, kjer je pomemben fizioterapevt. <p>Spolna funkcija (vulva, medenično dno), inkontinenca (stresni mehur, prolaps, ginekološka stanja). Spremembe v nosečnosti. Mehanizem poroda – poškodbe pri porodu, carski rez. Spinalne poškodbe, živčno-mišične bolezni, osteoporoz.</p> <ul style="list-style-type: none"> • Disfunkcije hrbtenice in medenice v prenatalnem in postnatalnem obdobju. • Fizioterapevtska ocena v ginekologiji in porodništvu: Anamneza, inspekcija, palpacija, postopki preventivnih in provokativnih testov. • Komunikacija z drugimi zdravstvenimi delavci v rehabilitacijskem timu. • Spremljanje in evalviranje ambulantne, hospitalne in zdraviliške ginekološko porodniške fizioterapije. 	<ul style="list-style-type: none"> • Specific features of rehabilitation for some comorbid conditions in the antenatal and postnatal period. • Gynaecological conditions where the physiotherapist is important. Sexual function (vulva, pelvic floor), incontinence (stress bladder, prolapse, gynaecological conditions). Changes in pregnancy. Mechanism of childbirth - birth injuries, caesarean section. Spinal injuries, neuromuscular diseases, osteoporosis. • Spinal and pelvic dysfunctions in the prenatal and postnatal period. • Physiotherapeutic assessment in gynaecology and obstetrics: history, inspection, palpation, preventive and provocative test procedures. • Communication with other health professionals in the rehabilitation team. • Monitoring and evaluation of outpatient, inpatient and spa gynaecological and obstetric physiotherapy.
