Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

- Vpis v drugi letnik študijskega programa.

Prerequisites:

- The prerequisite for participation is enrolment in the second year of study.

Vsebina:

- *Duševno zdravje.*
 - Definiranje temeljnih pojmov, značilnosti in pomen duševnega zdravja/bolezni za posameznika in družbo, vplivi na duševno zdravje.
- *Motnje v duševnem zdravju.*
 - Kontinuum duševnega zdravja, pojavnost motenj v duševnem zdravju v svetu, v Evropi in v Sloveniji.
- *Zgodovinski razvoj psihiatrije in zdravstvene nege na področju psihiatrije.*
 - V svetu, Evropi in Sloveniji.
- *Stereotipi in predsodki o osebah z motnjo*

Content (Syllabus outline):

- *Mental health.*
 - Defining fundamental concepts, characteristics and the meaning of the mental health/disease for the individual and society, the effects on mental health.
- *Mental health disorders.*
 - A continuum of mental health, the incidence of mental health disorders in the world, in Europe and in Slovenia.
- *The historical development of psychiatry and mental health nursing.*
 - In the world, Europe and Slovenia.

<p><i>v duševnem zdravju.</i></p> <ul style="list-style-type: none"> – Stereotipi in predsodki o samih motnjah in učinkih zdravljenja. • <i>Normativna podlaga za delovanje na področju duševnega zdravja.</i> <ul style="list-style-type: none"> – Deklaracija in akcijski načrt za področje duševnega zdravja v Evropi, Zelena knjiga o duševnem zdravju, Evropski pakt za duševno zdravje in dobro počutje, Zakon o duševnem zdravju, Resolucija o nacionalnem programu duševnega zdravja 2018-2028. • <i>Organizacija zdravstvenega varstva oseb z motnjo v duševnem zdravju.</i> • <i>Promocija duševnega zdravja.</i> • <i>Osnove zdravstvene nege v psihiatriji.</i> <ul style="list-style-type: none"> – Naloge, kompetence izvajalcev zdravstvene nege, procesna metoda dela, življenjski cikli in razvojne naloge, spoštovanje pacientovih pravic, terapevtska komunikacija, deeskalacijske tehnike komunikacije, vzpostavljanje in vzdrževanje terapevtskega odnosa in razumevanje vedenja, upravljanje z negovalnimi diagnozami in negovalnimi standardi, posebnosti kategorizacije zahtevnosti bolnišnične zdravstvene nege. • <i>Uporaba teoretičnih modelov zdravstvene nege v procesu obravnave pacienta na področju zdravstvene nege v psihiatriji.</i> <ul style="list-style-type: none"> – V. Cilji in kompetence:

Učna enota prispeva k razvoju naslednjih splošnih in specifičnih kompetenc:

- razvoj veščin in spretnosti v uporabi znanja na strokovnem področju,
- usposobljenost za holistično, tolerantno, skrbno in občutljivo obravnavo posameznika ali skupine, zagotavljanje ter varovanje pravic in želja posameznikov ali skupin,
- sposobnost vsestranskega in sistematičnega prilagajanja obravnave pacienta na relevantne fizikalne, socialne, kulturne, psihološke, spiritualne in družbene dejavnike,
- sposobnost prepoznati in interpretirati znake normalnega in spreminjajočega se zdravja (postavljanje negovalnih diagnoz),
- načrtovanje, izvajanje in evalvacija individualnih programov zdravstvene nege v sodelovanju s pacienti, stanovalci v socialno varstvenih zavodih, svojci in drugimi,
- sposobnost vključevanja standardov kakovosti s kritičnim ocenjevanjem, z interpretacijo, s sintezo informacij in pomočjo pacientom pri izbiri,
- usposobljenost za ustrezno uporabo niza veščin in intervencij ter zagotavljanje optimalne zdravstvene nege,
- sposobnost spoštovati pacientovo dostojanstvo, zasebnost in zaupnost podatkov,
- usposobljenost za prepoznavanje psihičnih stanj, duševnih kriz, dajanje emocionalne podpore in svetovanje.

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- development of skills and talents in using knowledge in the professional environment;
- qualification for autonomous, holistic, tolerant, careful and sensitive treatment of an individual or a group, passing no judgments when ensuring or protecting rights, trusts and desires of various individuals and groups,
- the ability of a comprehensive and systematic treatment of the patient in relation to the relevant psychological, social, cultural, psychological, spiritual and social factors,
- the ability to recognize and interpret the signs of a normal or changing health status (nursing diagnosis setup);
- planning, implementing and evaluating individual programmes of nursing care in cooperation with patients, relatives and other people;
- the ability of implementing quality standards with a critical evaluation, interpretation, synthesis and helping patients with their choice;
- the ability to use the multiple skills, and interventions for optimizing the nursing care process;
- the ability to respect the patient's dignity, privacy and confidentiality of the data;
- being able to recognize the mental states as fear, stress and depression, giving the emotional support and advice,

Predvideni študijski rezultati:

Znanje in razumevanje
Študent/študentka:

- pozna definicije duševnega zdravja in

Intended learning outcomes:

Knowledge in understanding:
Students:

- know the definition of mental health and

duševne motnje,

- spozna načine in oblike zdravljenja, zdravstvene nege in rehabilitacije pri ljudeh z duševno motnjo,
- se seznani s celostnim pristopom k obravnavi in zdravstveni negi pacientov z duševno motnjo,
- spozna teoretične modele v procesu zdravstvene nege pri skrbi za duševno zdravje,
- pozna načine za zagotavljanje kontinuirane zdravstvene nege in podporno mrežo skrbi za paciente z duševno motnjo v lokalnih skupnostih,
- se seznani s teorijami in kazalci zagotavljanja kakovosti storitev v psihiatrični zdravstveni negi,
- pridobi znanje za prepoznavanje in zadovoljevanje potreb pacientov po psihiatrični zdravstveni negi,
- pridobi znanje, spretnosti in izkušnje za delo v skupinah in za sodelovanje v terapevtskih programih,
- spozna načela in pridobi izkušnje za timsko delo in učinkovito komuniciranje v psihiatrični zdravstveni negi,

Klinično usposabljanje:

- spozna vlogo in naloge izvajalcev zdravstvene nege in drugih sodelujočih v obravnavi na področju psihiatrije,
- uporablja teoretične modele sodobne zdravstvene nege pri obravnavi pacienta na kliničnem usposabljanju,
- prepozna potrebe po zdravstveni negi,
- nudi kakovostno zdravstveno nego pacientom z različnimi težavami v duševnem zdravju,
- zna uporabljati procesno metodo dela pri obravnavi pacienta v psihiatrični zdravstveni negi,
- upošteva izkušnje pridobljene na podlagi timskega dela pri celostni in integrirani oskrbi ljudi z motnjo v duševnem zdravju,
- spozna, kako poteka zdravstveno vzgojno delo,
- uporablja načela učinkovitega komuniciranja v psihiatrični zdravstveni

mental disorders,

- discover the ways and forms of treatment, nursing care and rehabilitation for people with mental disorder,
- acquaint themselves with the holistic approach to treatment and nursing of patients with mental disorder in the process,
- discover the theoretical models of nursing care for mental health, familiar ways to provide continuous nursing care and network support for patients with mental disorder in local communities,
- acquaint themselves with the theories and indicators of quality assurance services in mental health care,
- obtain the knowledge to identify and meet the needs of patients in psychiatric nursing,
- acquire the knowledge, skills and experience to work in groups and to participate in therapeutic programs,
- understand the principles and experience of teamwork and effective communication in psychiatric nursing,

Clinical training:

- know the role and assignments of nursing care providers and other participants in psychiatric treatment,
- are using theoretical models of contemporary nursing care in the treatment of a patient in the clinical training,
- recognize the need for nursing care with the patients,
- offer high quality care to patients with different mental health problems,
- know how to use a procedural method in the treatment of a patient in a psychiatric health care,
- are taking into account the experience gained on the basis of teamwork in a holistic and integrated supply of people with the disorder in mental health,
- know how the health-educational work is being performed,
- apply principles of effective
