Predvideni študijski rezultati:

Študent/studentka:

- se seznani s temeljnimi sociološkimi in filozofskimi koncepti,
- izoblikuje sociološki in filozofski strokovni odnos do zdravja in zdravstvenega sistema,
- usposobi se za identifikacijo in razumevanje družbenih vzrokov obolenosti in zdravja ter zdravstvenega sistema,
- razume družbene dejavnike zdravja in bolezni,
- razvija sposobnosti kritičnega mišljenja in konstruktivnega sodelovanja v razpravi,
- usposobi se za uporabo raziskovalnih metod pri analiziranju družbenih dejavnikov zdravja.

Intended learning outcomes:

Knowledge and understanding:

Students:

- get acquainted with the basic sociological and philosophic concepts,
- develop sociological and philosophical professional attitude towards health and healthcare system,
- are qualified for identifying and understanding the social causes of diseases, health and the healthcare system,
- understand the social determinants of health and diseases,
- develop critical thinking skills and constructive participation in discussion,
- are qualified to use research methods in analysing social determinants of health.

Metode poučevanja in učenja:

- predavanja z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov),
- vaje v povezavi s prakso (refleksija izkušenj, projektno delo, timsko delo, metode kritičnega mišljenja, diskusija,

Learning and teaching methods:

- lectures with active student participation (explanation, discussion, questions, examples, problem solving);
- tutorial in connection with practice (reflexion of experience, project work, teamwork, methods of critical thinking: discussions, feedback, social games).

<p>sporočanje povratne informacije, socialne igre),</p> <ul style="list-style-type: none"> • eksperimentalne vaje, ki temeljijo na izkušenjskem, sodelovalnem in problemskem učenju (samostojno učenje, diskusija, razлага, opazovanje, timsko delo, študija primera, igra vlog, sodelovalno učenje, portfolio, evalvacija, samoocenjevanje), • individualne in skupinske konzultacije (diskusija, dodatna razлага, obravnava specifičnih vprašanj). 	<ul style="list-style-type: none"> • experimental exercises, based on experiential, collaborative and problem learning (self-study, discussion, explanation, observation, teamwork, case study, role-play, cooperative learning, portfolio, evaluation, self-assessment), • individual and group consultations (discussion, additional explanation, considering specific questions).
