Jeziki/ Languages:	Predavanja/Lectures: slovenski/Slovenian
	Vaje/Tutorial: slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Študent mora pred izpitom pripraviti in predstaviti ter zagovarjati projektno/raziskovalno nalogu.	Prerequisites: • Vpis v drugi letnik študijskega programa. • A prerequisite for inclusion is enrolment in the second year of study. • Student has to prepare, present and defend a project/research paper before the exam.
---	---

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> • Osnovni elementi genetskega svetovanja. Genetsko svetovanje, zgodovina, osebna in družinska anamneza, načini dedovanja, genetsko tveganje. • Prepoznavanje genetskih in negenetskih dejavnikov tveganja. Ocena dejavnikov tveganja, vrste genetske predispozicije. • Vloga genetskega svetovanja v klinični praksi. Pomen genetskega svetovanja, vrste genetskega testiranja, multidisciplinarnost. 	<ul style="list-style-type: none"> • Basic elements of genetic counselling. Genetic counselling, history, personal and family history, patterns of inheritance, genetic risk. • Identifying genetic and non-genetic risk factors. Assessment of risk factors, types of genetic predisposition. • The role of genetic counselling in clinical practice. The importance of genetic counselling, types of genetic testing, multidisciplinarity. • Ethical principles in genetic counselling and ethical dilemmas.

<ul style="list-style-type: none"> • <i>Etična načela v genetskem svetovanju in etične dileme.</i> Avtonomnost, testiranje otrok, predsimptomatsko testiranje <p>Seminarske vaje:</p> <ul style="list-style-type: none"> • Predstavitev primerov genetskega in genomskega informiranja in svetovanja. 	<p>Autonomy, child testing, pre-symptomatic testing</p> <p>Seminar tutorials:</p> <ul style="list-style-type: none"> • Presentations of genetic and genomic informing and counselling cases.

Temeljna literatura in viri/Readings:

Temeljna literatura/Basic literature

- Peterlin, B. in Witzl, K. (2003). *Humana genetika*. Ljubljana: Cankarjeva založba..
- Peterlin, B. (2014). *Genetika v ginekologiji*. Ljubljana: Univerzitetni klinični center, Klinični inštitut za medicinsko genetiko, Ginekološka klinika.

Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- usposobljenost za prepoznavanje potreb po zdravstveni negi, določitev negovalnih diagnoz, načrtovanje in izvajanje kakovostne in varne zdravstvene nege ter vrednotenje doseženih ciljev,
- avtonomnost pri sprejemanju odločitev v procesu zdravstvene nege,
- usposobljenost za komuniciranje v domaćem in mednarodnem okolju,
- zavezanost profesionalni etiki, sposobnost etičnega odločanja in ravnanja v primeru etičnih dilem v zdravstveni negi,
- elaboriranje in predstavitev individualno ali timsko pridobljenih dognanj,
- vsestransko in sistematično obravnavo pacienta glede na relevantne fizične, psihične, socialne, kulturne, duhovne in družbene dejavnike,
- aktivno promoviranje zdravja, ocenjevanje tveganja za nastanek bolezni in skrb za varnost ter zdravje ljudi,
- varovanje pacientovega dostojanstva, zasebnosti in zaupnosti podatkov,
- primerno komuniciranje v negovalnem, zdravstvenem, multidisciplinarnem timu, razvoj in vzdrževanje profesionalnih

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- qualification for recognising the nursing care needs, setting nursing diagnoses, planning and implementation of quality and safe nursing care, and evaluating the objectives achieved,
- autonomy in decision-making in the process of nursing care,
- the ability to communicate in the local and international environment,
- commitment to professional ethics, the ability to ethically decide and act in the event of ethical dilemmas in nursing care,
- elaboration and presentation of individual and teamwork findings,
- comprehensive and systematic treatment of the patient with regard to relevant physical, psychological, social, cultural, spiritual and social factors,
- active promotion of health, risk assessment and care for the safety and health of people,
- protection of patients' dignity, privacy and data confidentiality,
- appropriate communication in a nursing, health or multidisciplinary team, the development and maintenance of good mutual relations among employees, patients, their families, groups and the community,

<p>medsebojnih odnosov med zaposlenimi, pacienti, njihovimi družinami, skupinami in skupnostjo,</p> <ul style="list-style-type: none"> • planiranje, organiziranje in analiza storitev zdravstvene nege. 	<ul style="list-style-type: none"> • planning, organising and analysing nursing care services.
---	---

Predvideni študijski rezultati:

Študent/študentka:

- pozna osnove genetskega svetovanja in njegovo aplikacijo v klinični praksi,
- razume osnovne elemente genetskega svetovanja, vpliv genetskih bolezni na posameznika in družino, vlogo genetskega svetovanja v zdravstveni oskrbi oziroma klinični praksi,
- razume etične vidike genetskega informiranja in svetovanja,
- se usposobi za prepoznavanje dednih bolezni v družini, izdelavo osebne in družinske anamneze (družinskega drevesa), prepoznavo načinov dedovanja in genetskega tveganja,
- pozna organizacijo genetskih servisov, poznavanje klinične, edukacijske in psihosocialne podpore posamezniku/družini z genetsko boleznjijo.

Intended learning outcomes:

Students:

- know the basics of genetic counselling and its application in clinical practice,
- understand the basic elements of genetic counselling, the impact of genetic diseases on an individual and family, the role of genetic counselling in health care or clinical practice,
- understand the ethical aspects of genetic counselling,
- develops skills for the recognition of hereditary diseases in the family, the production of personal and family history (family tree), for identification of the methods of inheritance and genetic risk,
- know the organization of genetic services, knowledge of clinical, educational and psychosocial support to an individual / family with a genetic disease.

Metode poučevanja in učenja:

- *predavanja* z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov),
- *seminarske vaje*: priprava, predstavitev in uspešen zagovor projektne/raziskovalne naloge,
- *konzultacije*.

Learning and teaching methods:

- *lectures* with active student participation (explanation, discussion, questions, examples, problem solving);
- *tutorial*: preparation, presentation and a successful defence of a project/research paper,
- *consultations*.

Načini ocenjevanja:

Delež (v %)

Weight (in %)
